Senior Frontend / UI Engineer

SUMMARY

Senior Frontend Engineer with 14+ years building product-facing UIs in React, Next.js, and TypeScript. Recently shipped agentic notebook surfaces at Axiomatic AI (React 19) and generative UI for Zoom AI Companion. Strong in design-system thinking, Playwright e2e, accessibility-minded interfaces, and mentoring frontend engineers.

EXPERIENCE

Senior Software Engineer, Frontend — Axiomatic AI *(Remote / Boston)* **01/2026 – Present**

- Built and shipped core Lemma (agentic notebook) UI in **Next.js, React 19, and TypeScript**—owning conversation sidebar, streaming chat surfaces, and component architecture end-to-end.
- Integrated CopilotKit / AG-UI; resolved React 19 batching issues to unblock reliable streaming and headless chat behavior.
- Authored a **Playwright** e2e harness for non-deterministic agentic outputs using semantic embeddings and LLM-as-judge patterns for CI reliability.

Senior Software Engineer — Zoom Communications *(San Jose)* **09/2024 – 11/2025**

- Built generative UI for **Zoom AI Companion** with AI SDK and LLM backends (Claude, LangChain/LangGraph)—real-time streaming, tool orchestration, and dynamic component rendering on Zoom's product surface.
- Developed a JavaScript Snowplow telemetry SDK capturing usage across Zoom Docs, Billing, and AI Companion for richer product analytics.
- Implemented autocomplete search and Jupyter Notebook integration to improve data accessibility in product workflows.

Staff / Senior Software Engineer — Prealize Health *(San Mateo / Palo Alto)* **05/2021 – 08/2024**

- Led frontend for healthcare ML prediction dashboards in **React, Next.js, TypeScript, Redux, and Tailwind CSS**—clear data visualization for clinical/ops stakeholders.
- Mentored engineers, drove code reviews and FE best practices; automated Jest unit/integration tests and E2E coverage in CI/CD.
- Implemented OWASP CSP controls supporting HITRUST certification for web applications.

Senior Software Engineer — Bluevine Capital *(Redwood City)* **10/2022 – 08/2023**

- Streamlined unit testing for **Vue.js microfrontend** SPAs; mentored junior FE engineers and established ESLint standards for complexity and clean coding practices.

Senior Software Engineer — Zscaler Labs *(San Francisco)* **08/2019 – 04/2021**

- Delivered product features and automated e2e testing/CI/CD; participated in reviews and interviews while modernizing legacy Backbone.js UI.

Earlier roles — Yahoo/Adap.tv, IBM Commerce, Mellon Financial, Nuveen Investments **2006 – 2019**

- Senior/Advisory FE work across adtech, commerce, and finance—AngularJS→Ember micro-frontends, React product UI, and distribution dashboards; mentored junior engineers.

SKILLS

Frontend	React 19, Next.js, TypeScript, JavaScript (ES6+), Redux / RTK, Tailwind CSS, HTML5, CSS/SCSS, Vue.js, design systems & component architecture
UI & DX	Streaming chat UIs, generative UI, CopilotKit / AG-UI, D3 / Highcharts, Webpack, Vite
Testing	Playwright, Jest, React Testing Library, Cypress, E2E / CI reliability
Collaboration	Mentoring, code review standards, ESLint best practices, accessibility-minded UI

EDUCATION & CERTIFICATIONS

B.E. Electrical Engineering — Dharmsinh Desai Institute of Technology

Claude Code: Software Engineering with Generative AI Agents
